

## Assignment #1

- **Due Date: 9/26/21 by 11:59pm**
- **Deliverable: post your homework on Blackboard as a zipped file with the name “HW1\_YourLastName, FirstName”.**

### Use the data spreadsheet provided below to achieve the following:

1. Feed the information provided in this handout in MS Project to create the Project Plan and the Network Diagram
2. Create a WBS with the required phases and activities to complete this project
3. Assign the Resources to the Tasks making any assumptions you consider appropriate (Your assumptions should be based on Software Engineering Assumptions).
4. What is the earliest finish date for this project if it is scheduled to start on 9/26/21?
5. If you are not allowed to use more than 20% of the resources available at any point of time for this project, what is the earliest finish date for this project if it is scheduled to start on 9/26/21?
6. Submit your MS Project File and a PDF document with your answers to Question #4 and Question #5 above.

### Resources Available

**Important Note:** ONLY assign the needed resources to the tasks; for example a project manager needs one manager of the available managers, however, you could use more than one requirement engineer to work on writing the requirements.

Category	Initials
Project Manager	PM1, PM2, PM3
Requirement Engineers	RE1, RE2, RE3, RE7, RE8, RE9, RE10, RE13, RE14, RE15
System Engineers	SE9, SE11, SE12, SE13, SE14, SE15, SE16
Programmers/Software Engineers	PE4, PE5, PE7, PE8, PE12, PE13, PE22, PE23, PE24, PE25, PE26, PE27, PE28, PE29
Test Engineers	TE1, TE2, TE3, TE7, TE8, TE44, TE45, TE46, TE47, TE48, TE49
Documentation Engineers	DE1, DE2, DE7, DE8, DE13, DE14, DE43, DE44, DE45

### **Assumptions and Constraints:**

1. Every review or inspection "meeting" task shall be carried by 5 engineers including ONE of the author(s)
2. Every review or inspection "preparation" task shall be carried by 4 engineers excluding the author(s)
3. Any "Rework" task can be executed by one or all authors of the original task
4. Project Plan shall be reviewed by at least ONE engineer from every technical area.
5. Risk mitigation and contingency plan shall be reviewed by at least ONE engineer from every technical area.
6. System Engineers are responsible for creating Analysis and Design artifacts

### **Task/Activity Dependencies:**

It is expected that you will find the correct task dependencies based on the material discussed during class and considering the following constraints:

1. There is no technical task prior to requirement phase; project planning is not a technical task it is a managerial task.
2. Analysis Activity can start as soon as requirement document is complete
3. Design activity can start as soon as Analysis document is complete
4. Data Model task can start when Detailed Design task finishes
5. Coding can start as soon as design is complete
6. Writing Test Plan can start as soon as requirements are complete
7. Executing Test Plan can start as soon as coding is complete
8. Documentation can start as soon as requirements are complete
9. Any other constraints that you might add, shall be documented clearly when you submit your homework.
10. Risk mitigation and contingency planning can start after project plan is complete, and can finish any time before analysis starts.

Task	Amount of Work	Productivity Rate
<b>Project Plan</b>		
Write Plan	83 pages	2 pages/Hour
Review Plan		
Preparation for review		5 pages/Hour
Review Meeting		10 pages/Hour
Rework	49 defects	10 defects/Hour
<b>Risk Mitigation and Contingency Plan</b>		
Write Plan	22 pages	2 pages/Hour
